# Documentation of Chapter 1 project
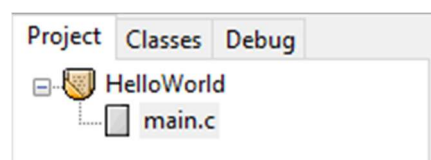

IDE Installation:

Dev-C++ 5.11 is already installed on this machine.

Project File Creation:

Creating a new C console application project titled as "HelloWorld" with Dev-C++:

Project folder hierarchy:
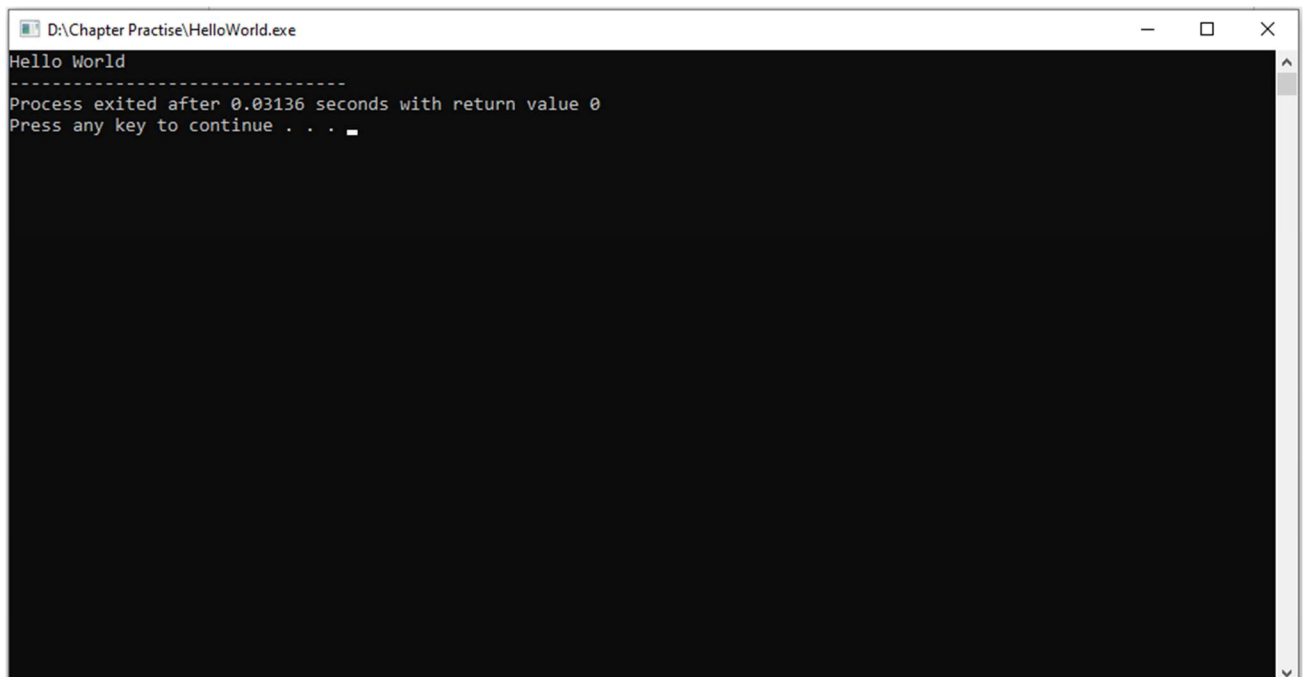

Source Code:

This is the driver code which is written in the main.c source file

```c
[*] main.c
1   #include <stdio.h>
2   #include <stdlib.h>
3   int main() {
4       printf("Hello World");
5       return 0;
6   }
```

Output:

Here is the output of the C program

```
D:\Chapter Practise\HelloWorld.exe                                    —   □   ×
Hello World
----------------------------------
Process exited after 0.03136 seconds with return value 0
Press any key to continue . . . _
```
